Special Service Craft – Document Map
Volume 1
PART 1 - REGULATIONS
CHAPTER 1 GENERAL REGULATIONS
Sections 1 to 10
CHAPTER 2 CLASSIFICATION REGULATIONS
Section 1 Conditions for classification
Section 2 Scope of the Rules
Section 3 Character of classification and class notations
Section 4 Surveys – General
Section 5 IACS QSCS Audits
Section 6 Type Approval/Type testing/Quality control system
Section 7 Classification of machinery for craft/yachts with [Maltese Cross] LMC or MCH notation
CHAPTER 3 PERIODICAL SURVEY REGULATIONS FOR SERVICE CRAFT
Section 1 General
Section 2 Annual Surveys – Hull and machinery requirements
Section 3 Intermediate Surveys – Hull and machinery requirements
Section 4 Docking Surveys and In-water Surveys – Hull and machinery requirements
Section 5 Special Survey – General – Hull requirements
Section 6 Special Survey – Thickness measurement requirements for steel craft
Section 7 Machinery surveys – General requirements
Section 8 Gas turbines – Detailed requirements
Section 9 Oil engines – Detailed requirements
Section 10 Electrical equipment
Section 11 Screwshafts, tube shafts, propellers and water jet units
Section 12 Classification of craft not built under survey
CHAPTER 4 PERIODICAL SURVEY REGULATIONS FOR YACHTS
Section 1 General
Section 2 Intermediate Surveys – Hull and machinery requirements
Section 3 Docking Surveys and In-water Surveys – Hull and machinery requirements
Section 4 Special Survey – General – Hull requirements
Section 5 Special Survey – Thickness measurement requirements for steel yachts
Section 6 Machinery surveys – General requirements
Section 7 Gas turbines – Detailed requirements
Section 8 Oil engines – Detailed requirements
Section 9 Electrical equipment
Section 10 Screwshafts, tube shafts, propellers and water jet units
Section 11 Surveys of unclassed machinery in existing classed yachts
Section 12 Classification of yachts not built under survey

CHAPTER 5 PERIODICAL SURVEY REGULATIONS FOR AMPHIBIOUS AIR CUSHION VEHICLES (ACV)
Section 1 General
Section 2 Annual Surveys – Hull and machinery requirements
Section 3 Intermediate Surveys – Hull and machinery requirements
Section 4 Special Surveys (Hull and machinery)
Section 5 Classification of ACVs not built under survey
Volume 2
PART 2 - RULES FOR THE MANUFACTURE, TESTING AND CERTIFICATION OF MATERIALS
CHAPTER 1 GENERAL REQUIREMENTS
Section 1 Scope
Section 2 Approval and survey requirements
Section 3 Certification of materials
Section 4 General requirements for manufacture
CHAPTER 2 TESTING PROCEDURES FOR METALLIC MATERIALS
Section 1 General requirements for testing
Section 2 Tensile tests
Section 3 Impact tests
Section 4 Ductility tests for pipes and tubes
Section 5 Embrittlement tests
Section 6 Crack tip opening displacement tests
Section 7 Bend tests
Section 8 Corrosion tests
CHAPTER 3 ROLLED STEEL PLATES, STRIP, SECTIONS AND BARS
Section 1 General requirements
Section 2 Normal strength steels for ship and other structural applications
Section 3 Higher strength steels for ship and other structural applications
Section 4 Steels for boilers and pressure vessels
Section 5 Steels for machinery fabrications
Section 6 Ferritic steels for low temperature service
Section 7 Austenitic and duplex stainless steels
Section 8 Plates with specified through thickness properties
Section 9 Bars for welded chain cables
Section 10 High strength quenched and tempered steels for welded structures
CHAPTER 4 STEEL CASTINGS
Section 1 General requirements
Section 2 Castings for ship and other structural applications
Section 3 Castings for machinery construction
Section 4 Castings for crankshafts
Section 5 Castings for propellers

Section 6 Castings for boilers, pressure vessels and piping systems
Section 7 Ferritic steel castings for low temperature service
Section 8 Austenitic stainless steel castings
Section 9 Steel castings for container corner fittings
CHAPTER 5 STEEL FORGINGS
Section 1 General requirements
Section 2 Forgings for ship and other structural applications
Section 3 Forgings for shafting and machinery
Section 4 Forgings for crankshafts
Section 5 Forgings for gearing
Section 6 Forgings for turbines
Section 7 Forgings for boilers, pressure vessels and piping systems
Section 8 Ferritic steel forgings for low temperature service
Section 9 Austenitic stainless steel forgings
CHAPTER 6 STEEL PIPES AND TUBES
Section 1 General requirements
Section 2 Seamless pressure pipes
Section 3 Welded pressure pipes
Section 4 Ferritic steel pressure pipes for low temperature service
Section 5 Austenitic stainless steel pressure pipes
Section 6 Boiler and superheater tubes
CHAPTER 7 IRON CASTINGS
Section 1 General requirements
Section 2 Grey iron castings
Section 3 Spheroidal or nodular graphite iron castings
Section 4 Iron castings for crankshafts
CHAPTER 8 ALUMINIUM ALLOYS
Section 1 Plates, bars and sections
Section 2 Aluminium alloy rivets
Section 3 Aluminium alloy castings
Section 4 Aluminium/steel transition joints
CHAPTER 9 COPPER ALLOYS
Section 1 Castings for propellers
Section 2 Castings for valves, liners and bushes
Section 3 Tubes
CHAPTER 10 EQUIPMENT FOR MOORING AND ANCHORING
Section 1 Anchors
Section 2 Stud link chain cables for ships
Section 3 Stud link mooring chain cables

Section 4 Studless mooring chain cables
Section 5 Short link chain cables
Section 6 Steel wire ropes
Section 7 Fibre ropes
CHAPTER 11 APPROVAL OF WELDING CONSUMABLES
Section 1 General
Section 2 Mechanical testing procedures
Section 3 Electrodes for manual and gravity welding
Section 4 Wire-flux combinations for submerged-arc automatic welding
Section 5 Wires and wire-gas combinations for manual, semi-automatic and automatic welding
Section 6 Consumables for use in electro-slag and electro-gas welding
Section 7 Consumables for use in one-side welding with temporary backing materials
Section 8 Consumables for welding austenitic and duplex stainless steels
Section 9 Consumables for welding aluminium alloys
CHAPTER 12 FABRICATED STEEL SECTIONS
Section 1 General
Section 2 Materials
Section 3 Manufacture
Section 4 Inspection and testing
CHAPTER 13 WELDED STEEL MACHINERY STRUCTURES
Section 1 General
Section 2 Steel selection
Section 3 Rolled steel materials
Section 4 Steel castings
Section 5 Steel forgings
Section 6 Welding consumables
Section 7 Fabrication procedures
Section 8 Post weld heat treatment
Section 9 Inspection
CHAPTER 14 PLASTICS MATERIALS
Section 1 General requirements
Section 2 Tests on polymers, resins, reinforcements and associated materials
Section 3 Testing procedures
Section 4 Plastics pipes and fittings
Section 5 Control of material quality for composite construction
Volume 3
PART 3 - GENERAL REQUIREMENTS AND CONSTRUCTIONAL ARRANGEMENTS
CHAPTER 1 GENERAL REGULATIONS
Section 1 Rules application

Section 2 Direct calculations
Section 3 Equivalents
Section 4 National and International Regulations
Section 5 Information required
Section 6 Definitions
Section 7 Inspection, workmanship and testing procedures
Section 8 Building tolerances and associated repairs
CHAPTER 2 CRAFT DESIGN
Section 1 General
Section 2 Rule structural concept
Section 3 Structural idealisation
Section 4 Bulkhead arrangements
Section 5 Fore and aft end arrangements
Section 6 Machinery space arrangements
Section 7 Superstructures, deckhouses and bulwarks
Section 8 Particular requirements for multi-hulls
CHAPTER 3 CONTROL SYSTEMS
Section 1 General
Section 2 Rudders
Section 3 Sternframes and appendages
Section 4 Fixed and steering nozzles, bow and stern thrust units
Section 5 Stabiliser arrangements
Section 6 Particular requirements for multi-hull craft
CHAPTER 4 CLOSING ARRANGEMENTS AND OUTFIT
Section 1 General
Section 2 Bulkhead openings
Section 3 Double bottom openings
Section 4 Side and stern doors and other shell openings
Section 5 Hatches on exposed decks
Section 6 Miscellaneous openings
Section 7 Portlights, windows and viewing ports, skylights and glass walls
Section 8 Bulwarks, guard rails and other means for the protection of crew
Section 9 Deck drainage
Section 10 Cabin sole and lining
Section 11 Ventilators
Section 12 Air and sounding pipes
Section 13 Particular requirements for multi-hull craft
CHAPTER 5 ANCHORING AND MOORING EQUIPMENT
Section 1 General

Section 2 Equipment Number
Section 3 Service group factors
Section 4 Craft type factors
Section 5 Anchors
Section 6 Anchor cable
Section 7 Mooring ropes and towlines
Section 8 Windlass design and testing
Section 9 Structural details
PART 4 - ADDITIONAL REQUIREMENTS FOR YACHTS
CHAPTER 1 GENERAL REGULATIONS
Section 1 Introduction
Section 2 International Rating Class (IRC) Yachts
CHAPTER 2 ALL YACHTS
Section 1 General
Section 2 Ship side valves
Section 3 Anchor stowage
Section 4 Bathing and watersport platforms and shell openings
Section 5 Deck safety equipment
Section 6 Protection of openings
Section 7 Corrosion protection
Section 8 Intact stability
Section 9 Damage stability
Section 10 Navigation in first-year ice conditions
CHAPTER 3 SPECIAL CONSIDERATIONS FOR SAILING YACHTS
Section 1 Hull design and construction parameters
Section 2 Hull construction
Section 3 Chain plates
Section 4 Deck planking
Section 5 Deck fittings
Section 6 Ballast keels
Section 7 Rudder skegs and rudders
Section 8 Open cockpits and companionways
Section 9 Anchoring and mooring equipment
Section 10 Intact stability
PART 5 - DESIGN AND LOAD CRITERIA
CHAPTER 1 GENERAL
Section 1 Rule application
Section 2 Direct calculations
Section 3 Model experiments

CHAPTER 2 LOCAL DESIGN LOADS
Section 1 Environmental conditions
Section 2 Definitions and symbols
Section 3 Motion response
Section 4 Loads on shell envelope
Section 5 Impact loads
Section 6 Cross-deck structure for multi-hull craft
Section 7 Component design loads
CHAPTER 3 LOCAL DESIGN CRITERIA FOR CRAFT OPERATING IN NON-DISPLACEMENT MODE
Section 1 General
Section 2 Nomenclature and design factors
Section 3 Hull envelope design criteria
CHAPTER 4 LOCAL DESIGN CRITERIA FOR CRAFT OPERATING IN DISPLACEMENT MODE
Section 1 General
Section 2 Nomenclature and design factors
Section 3 Hull envelope design criteria
CHAPTER 5 GLOBAL LOAD AND DESIGN CRITERIA
Section 1 General
Section 2 Hull girder load criteria for mono-hull craft
Section 3 Hull girder load criteria for multi-hull craft
Section 4 Primary load criteria for multi-hull craft
Section 5 Design criteria and load combinations
Section 6 Loading guidance information
Volume 4
PART 6 - HULL CONSTRUCTION IN STEEL
CHAPTER 1 GENERAL
Section 1 Application
Section 2 General requirements
CHAPTER 2 CONSTRUCTION PROCEDURES
Section 1 General
Section 2 Materials
Section 3 Procedures for welded construction
Section 4 Joints and connections
CHAPTER 3 SCANTLING DETERMINATION FOR MONO-HULL CRAFT
Section 1 General
Section 2 Minimum thickness requirements
Section 3 Shell envelope plating
Section 4 Shell envelope framing
Section 5 Single bottom structure and appendages

Section 6 Double bottom structure
Section 7 Bulkheads and deep tanks
Section 8 Deck structures
Section 9 Superstructures, deckhouses and bulwarks
Section 10 Pillars and pillar bulkheads
CHAPTER 4 SCANTLING DETERMINATION FOR MULTI-HULL CRAFT
Section 1 General
Section 2 Minimum thickness requirements
Section 3 Shell envelope plating
Section 4 Shell envelope framing
Section 5 Single bottom structure and appendages
Section 6 Double bottom structure
Section 7 Bulkheads and deep tanks
Section 8 Deck structures
Section 9 Superstructures, deckhouses, pillars and bulwarks
CHAPTER 5 SPECIAL FEATURES
Section 1 General
Section 2 Special features
Section 3 Vehicle decks
Section 4 Bow doors
Section 5 Moveable decks
Section 6 Helicopter landing areas
Section 7 Strengthening requirements for navigation in ice conditions
CHAPTER 6 HULL GIRDER STRENGTH
Section 1 General
Section 2 Hull girder strength for mono-hull craft
Section 3 Additional hull girder strength requirements for multi-hull craft
CHAPTER 7 FAILURE MODES CONTROL
Section 1 General
Section 2 Deflection control
Section 3 Stress control
Section 4 Buckling control
Section 5 Vibration control
Volume 5
PART 7 - HULL CONSTRUCTION IN ALUMINIUM
CHAPTER 1 GENERAL
Section 1 Application
Section 2 General requirements
CHAPTER 2 CONSTRUCTION PROCEDURES

Section 1 General
Section 2 Materials
Section 3 Procedures for welded construction
Section 4 Joints and connections
CHAPTER 3 SCANTLING DETERMINATION FOR MONO-HULL CRAFT
Section 1 General
Section 2 Minimum thickness requirements
Section 3 Shell envelope plating
Section 4 Shell envelope framing
Section 5 Single bottom structure and appendages
Section 6 Double bottom structure
Section 7 Bulkheads
Section 8 Deck structures
Section 9 Superstructures, deckhouses and bulwarks
Section 10 Pillars and pillar bulkheads
CHAPTER 4 SCANTLING DETERMINATION FOR MULTI-HULL CRAFT
Section 1 General
Section 2 Minimum thickness requirements
Section 3 Shell envelope plating
Section 4 Shell envelope framing
Section 5 Single bottom structure and appendages
Section 6 Double bottom structure
Section 7 Bulkheads and deep tanks
Section 8 Deck structures
Section 9 Superstructures, deckhouses, pillars and bulwarks
CHAPTER 5 SPECIAL FEATURES
Section 1 General
Section 2 Special features
Section 3 Vehicle decks
Section 4 Bow doors
Section 5 Moveable decks
Section 6 Helicopter landing areas
Section 7 Strengthening requirements for navigation in ice conditions
CHAPTER 6 HULL GIRDER STRENGTH
Section 1 General
Section 2 Hull girder strength for mono-hull craft
Section 3 Additional hull girder strength requirements for multi-hull craft
CHAPTER 7 FAILURE MODES CONTROL
Section 1 General

Section 2 Deflection control
Section 3 Stress control
Section 4 Buckling control
Section 5 Vibration control
Volume 6
PART 8 - HULL CONSTRUCTION IN COMPOSITE
CHAPTER 1 GENERAL
Section 1 Application
Section 2 General requirements
CHAPTER 2 CONSTRUCTION PROCEDURE
Section 1 General requirements
Section 2 Materials
Section 3 General construction process
Section 4 Additional procedures for sandwich construction
Section 5 Details and fastenings
CHAPTER 3 SCANTLING DETERMINATION FOR MONO-HULL CRAFT
Section 1 General
Section 2 Minimum thickness requirements
Section 3 Shell envelope laminate
Section 4 Shell envelope framing
Section 5 Single bottom structure and appendages
Section 6 Double bottom structure
Section 7 Bulkheads and deep tanks
Section 8 Deck structures
Section 9 Superstructures, deckhouses and bulwarks
Section 10 Pillars and pillar bulkheads
CHAPTER 4 SCANTLING DETERMINATION FOR MULTI-HULL CRAFT
Section 1 General
Section 2 Minimum thickness requirements
Section 3 Shell envelope laminate
Section 4 Shell envelope framing
Section 5 Single bottom structure and appendages
Section 6 Double bottom structure
Section 7 Bulkheads and deep tanks
Section 8 Deck structures
Section 9 Superstructures, deckhouses, bulwarks and pillars
CHAPTER 5 SPECIAL FEATURES
Section 1 General
Section 2 Special features

Section 3 Vehicle decks
Section 4 Movable decks
Section 5 Helicopter landing areas
Section 6 Strengthening requirements for navigation in ice conditions
CHAPTER 6 HULL GIRDER STRENGTH
Section 1 General
Section 2 Hull girder strength for mono-hull craft
Section 3 Hull girder strength for multi-hull craft
CHAPTER 7 FAILURE MODES CONTROL
Section 1 General
Section 2 Deflection control
Section 3 Stress control
Section 4 Buckling control
Section 5 Impact control
Section 6 Temperature control of cored sandwich structures
Volume 7
PART 9 - GENERAL REQUIREMENTS FOR MACHINERY
CHAPTER 1 GENERAL REQUIREMENTS FOR MACHINERY
Section 1 General requirements
Section 2 Particulars to be submitted
Section 3 Certification of materials
Section 4 Operating conditions
Section 5 Securing of machinery
Section 6 Requirements for craft which are not required to comply with the HSC Code
CHAPTER 2 SURVEYS DURING CONSTRUCTION, INSTALLATION AND SEA TRIALS
Section 1 General requirements
Section 2 Diesel engines
Section 3 Turbo-chargers
Section 4 Gas turbines
Section 5 Gearing
Section 6 Shafting systems
Section 7 Propellers
Section 8 Water jet units
Section 9 Thrusters
Section 10 Steering systems
Section 11 Sea trials
PART 10 - PRIME MOVERS
CHAPTER 1 DIESEL ENGINES
Section 1 General requirements

Section 2 Particulars to be submitted
Section 3 Materials
Section 4 Crankshaft design
Section 5 Construction and welded structures
Section 6 Safety arrangements on engines
Section 7 Starting arrangements
Section 8 Piping systems
Section 9 Control and monitoring
Section 10 Requirements for craft which are not required to comply with the HSC Code
Section 11 Mass produced engines
Section 12 Mass produced turbo-chargers
Section 13 Electronically controlled engines
CHAPTER 2 GAS TURBINES
Section 1 General requirements
Section 2 Particulars to be submitted
Section 3 Materials
Section 4 Design
Section 5 Construction
Section 6 Starting arrangements
Section 7 Piping systems
Section 8 Control and monitoring
Section 9 Requirements for craft which are not required to comply with the HSC Code
PART 11 - TRANSMISSION SYSTEMS
CHAPTER 1 GEARING
Section 1 General requirements
Section 2 Particulars to be submitted
Section 3 Materials
Section 4 Design of gearing
Section 5 Piping systems for gearing
Section 6 Control and monitoring
Section 7 Requirements for craft which are not required to comply with the HSC Code
CHAPTER 2 SHAFTING SYSTEMS
Section 1 General requirements
Section 2 Particulars to be submitted
Section 3 Materials
Section 4 Design and construction
Section 5 Control and monitoring
Section 6 Requirements for craft which are not required to comply with the HSC Code
PART 12 - PROPULSION DEVICES

CHAPTER 1 PROPELLERS
Section 1 General requirements
Section 2 Plans and particulars
Section 3 Materials
Section 4 Propeller design
Section 5 Piping systems
Section 6 Control and monitoring
Section 7 Requirements for craft which are not required to comply with the HSC Code
CHAPTER 2 WATER JET SYSTEMS
Section 1 General requirements
Section 2 Particulars to be submitted
Section 3 Materials
Section 4 Design and construction
Section 5 Piping systems
Section 6 Control and monitoring
Section 7 Electrical systems
Section 8 Requirements for craft which are not required to comply with the HSC Code
CHAPTER 3 THRUSTERS
Section 1 General requirements
Section 2 Particulars to be submitted
Section 3 Materials
Section 4 Design and construction
Section 5 Piping systems
Section 6 Control and monitoring
Section 7 Electrical systems
Section 8 Requirements for craft which are not required to comply with the HSC Code
PART 13 - SHAFT VIBRATION AND ALIGNMENT
CHAPTER 1 TORSIONAL VIBRATION
Section 1 General requirements
Section 2 Details to be submitted
Section 3 Design
Section 4 Measurements
Section 5 Requirements for craft which are not required to comply with the HSC Code
CHAPTER 2 AXIAL VIBRATION
Section 1 General requirements
Section 2 Details to be submitted
Section 3 Design
Section 4 Measurements
Section 5 Requirements for craft which are not required to comply with the HSC Code

CHAPTER 3 LATERAL VIBRATION
Section 1 General requirements
Section 2 Details to be submitted
Section 3 Measurements
Section 4 Requirements for craft which are not required to comply with the HSC Code
CHAPTER 4 SHAFT VIBRATION AND ALIGNMENT
Section 1 Shaft alignment
Section 2 Requirements for craft which are not required to comply with the HSC Code
PART 14 - STEERING SYSTEMS
CHAPTER 1 STEERING SYSTEMS
Section 1 General requirements
Section 2 Particulars to be submitted
Section 3 Materials
Section 4 Design and performance
Section 5 Piping systems
Section 6 Control, monitoring and electrical equipment
Section 7 Requirements for craft which are not required to comply with the HSC Code
PART 15 - PIPING SYSTEMS AND PRESSURE PLANT
CHAPTER 1 PIPING DESIGN REQUIREMENTS
Section 1 Application
Section 2 Details to be submitted
Section 3 Class of pipes
Section 4 Design symbols and definitions
Section 5 Carbon and low alloy steels
Section 6 Copper and copper alloys
Section 7 Cast iron
Section 8 Plastics
Section 9 Stainless steel
Section 10 Aluminium alloy
Section 11 Material certificates
Section 12 Requirements for valves
Section 13 Requirements for flexible hoses
Section 14 Hydraulic tests on pipes and fittings
Section 15 Requirements for small craft which are not required to comply with the HSC Code
Section 16 Guidance notes on metal pipes for water services
CHAPTER 2 HULL PIPING SYSTEMS
Section 1 General
Section 2 Construction and installation
Section 3 Shell valves and fittings (other than those on scuppers and sanitary discharges)

Section 4 Bilge pumping and drainage systems
Section 5 Bilge drainage of machinery spaces with a propulsion prime mover
Section 6 Emergency bilge drainage
Section 7 Size of bilge suction pipes
Section 8 Pumps on bilge service
Section 9 Bilge main arrangements and materials
Section 10 Submersible bilge pump arrangements
Section 11 Air, overflow and sounding pipes
Section 12 Requirements for multi-hull craft
Section 13 Additional requirements for Passenger (B) Craft
Section 14 Requirements for small craft which are not required to comply with the HSC Code
Section 15 Requirements for yachts and service craft of 24 m or greater in length, which are not required to comply with the HSC Code
Section 16 Additional requirements for yachts to be assigned the Yacht (P) notation
Section 17 Requirements for Air Cushion Vehicles
CHAPTER 3 MACHINERY PIPING SYSTEMS
Section 1 Application
Section 2 General requirements
Section 3 Oil fuel storage
Section 4 Oil fuel systems
Section 5 Low flash point fuels
Section 6 Lubricating/hydraulic oil systems
Section 7 Engine cooling water systems
Section 8 Special requirements for multi-hull craft
Section 9 Requirements for Passenger (A) Craft
Section 10 Requirements for small craft which are not required to comply with the HSC Code
CHAPTER 4 PRESSURE PLANT
Section 1 General requirements
Section 2 Cylindrical shells subject to internal pressure
Section 3 Spherical shells subject to internal pressure
Section 4 Dished ends subject to internal pressure
Section 5 Standpipes and branches
Section 6 Unstayed circular flat end plates
Section 7 Construction
Section 8 Requirements for fusion welded pressure vessels
Section 9 Mountings and fittings for pressure vessels
Section 10 Hydraulic tests
Section 11 Fibre reinforced plastics pressure vessels
Section 12 Requirements for craft which are not required to comply with the HSC Code
PART 16 - CONTROL AND ELECTRICAL ENGINEERING

CHAPTER 1 CONTROL ENGINEERING SYSTEMS
Section 1 General requirements
Section 2 Essential features for control, alarm and safety systems
Section 3 Unattended machinery space(s) – UMS notation
Section 4 Machinery operated from a centralized control station – CCS notation
Section 5 Requirements for craft which are not required to comply with the HSC Code
Section 6 Trials
CHAPTER 2 ELECTRICAL ENGINEERING
Section 1 General requirements
Section 2 Main source of electrical power
Section 3 Emergency source of electrical power
Section 4 External source of electrical power
Section 5 Supply and distribution
Section 6 System design – Protection
Section 7 Switchgear and control gear assemblies
Section 8 Rotating machines
Section 9 Converter equipment
Section 10 Electrical cables and busbar trunking systems (busways)
Section 11 Batteries
Section 12 Equipment – Heating, lighting and accessories
Section 13 Electrical equipment for use in explosive atmospheres
Section 14 Navigation and manoeuvring systems
Section 15 Electric propulsion
Section 16 Fire safety systems
Section 17 Crew and passenger emergency safety systems
Section 18 Craft safety systems
Section 19 Cargo craft, patrol and pilot craft, workboats and other similar craft of less than 500 tons gross tonnage for operation in Service Groups 1 to 3, and yachts not having the notation Yacht (P)
Section 20 Testing and trials
Volume 8
PART 17 - FIRE PROTECTION, DETECTION AND EXTINCTION
CHAPTER 1 FIRE PROTECTION, DETECTION AND EXTINCTION — GENERAL
Section 1 General requirements
Section 2 Definitions
CHAPTER 2 FIRE PROTECTION, DETECTION AND EXTINCTION — SERVICE CRAFT
Section 1 General requirements
Section 2 Fire safety measures for service craft
CHAPTER 3 FIRE PROTECTION, DETECTION AND EXTINCTION – YACHTS
Section 1 General requirements

Section 2 Fire safety measures for yachts of overall length greater than 24 m but not greater than 50 m Rule length
Section 3 Fire safety measures for yachts of greater than 50 m Rule length
CHAPTER 4 SYSTEM AND EQUIPMENT SPECIFICATIONS
Section 1 Automatic sprinkler, fire detection and fire-alarm systems
Section 2 Fixed fire detection and fire-alarm systems
Section 3 Fixed fire-extinguishing systems in machinery spaces
Section 4 Fireman’s outfits
Section 5 Fire-control plans
Section 6 Fire-extinguishers (portable and non-portable)
